

Bentley International Users Conference Success Awards

September 21st 2001

The third Annual Success Awards Gala and Banquet took place September 21, 2000 during the Bentley International Users Conference. Each year it honors exceptional achievements formulated with Bentley technology.

Over 15 architecture, engineering and construction company's and students were honored. Foster and Partners received the Lifetime Achievement.

Quantum Leap Consultancy as Consultant to SOCOG received the Success Award for Facility Management for its use of Bentley's products as part of their solution. SOCOG with assistance from Quantum Leap Consultancy, used Bentley technology to manage space in the Olympic Village. Built to house more than 15,000 people, host over 3,000 visitors daily and expect an overall population of approximately 22,000 at any one time, the Village required a comprehensive system that could handle a number of things. The system managed factors such as: assignment of catalogued furniture, fitting and equipment; housing allocation and country-specific space assignments; and integration with the Olympic architectural space data and drawings.
